

# How to destroy a credit or debit card

This guide will tell you how to prevent somebody to steel your money and/or identity when your credit or debit card expired or is replaced.

Written By: Truls Zhong Konstali

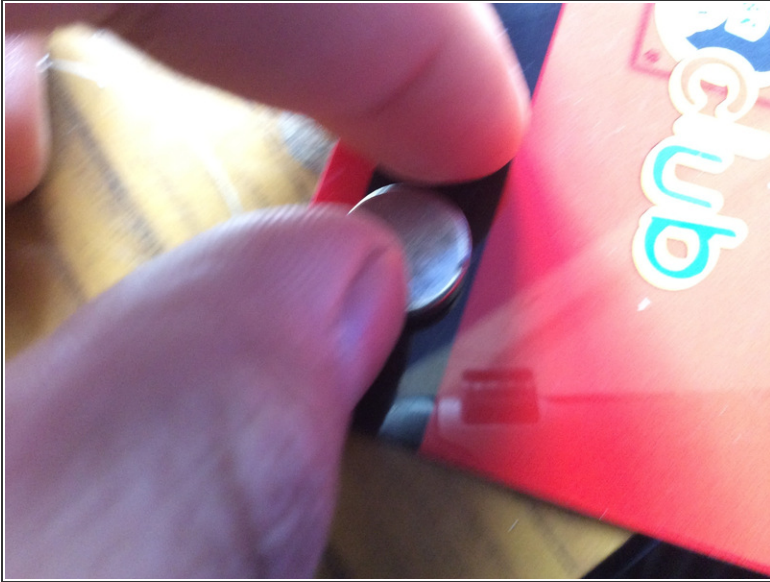

## INTRODUCTION

This guide will tell you how to prevent somebody to steel your money and/or identity when your credit or debit card expired or is replaced.

Note this can NOT be undone

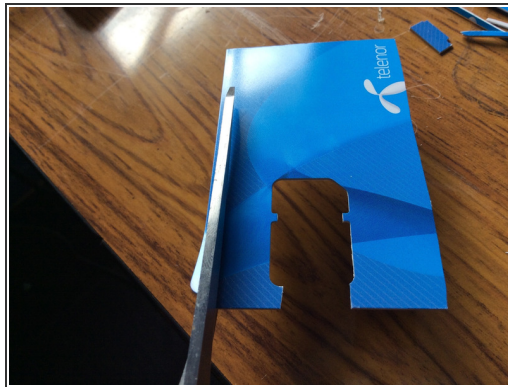

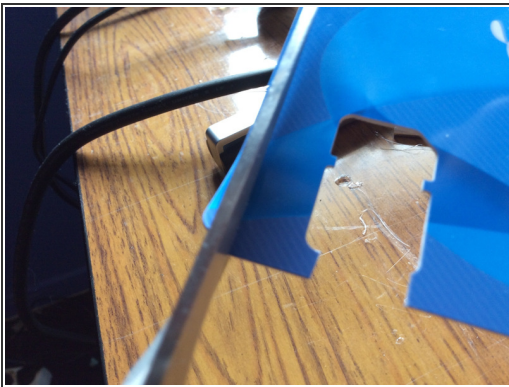

## Step 1 — How to destroy a credit or debit card

- Take a magnet and swipe it over the magnetic strip **minimum** 10 times.
- Take something **sharp** and make hole where the **chip** was.

## Step 2

- Use a pair of scissors and cut the card into thin strips.
- See the photo.
- It is **not** recommended to have the strips thicker then **2mm**.

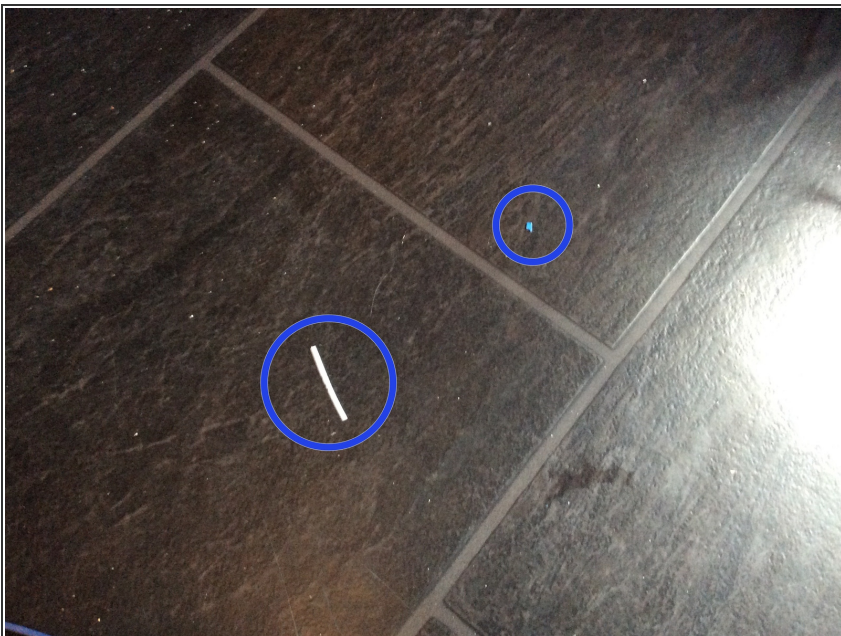

## Step 3

- The distance you see in the blue circle is **not** recommended to be more then **2mm**.
- Cut the card into many small parts as seen on the photo.
- It is recommended to have a box/tin to prevent the parts to fly anywhere.

## Step 4

- Look on the floor and on the table and see if you lost some parts of the card
- If you found some, cut them also.
- See previous steps.

## Step 5

- Take some parts in the trash at home and some other an other place, eg work, public area, etc.
- Recomanded min 2 places
  - Taking it to the **neighbor** will **not** increase security a lot.
